## Product Description

### All-on-4/6 Dental Implants

The All-on-4/6 implant system is a semi-full dental solution that offers a more complex yet effective alternative to traditional dental implants. High-quality All-on-4/6 implants from ADS China Dental Lab help patients adapt quickly and comfortably to their new dentures.

### Expertise at ADS China Dental Lab

Our laboratory boasts 10 experienced technicians, each with over a decade of expertise in implant fabrication. Their skill ensures prompt identification and resolution of fabrication challenges, guaranteeing client satisfaction.

### Key Features

**Reduced Implant Placement:** Uses 4 or 6 implants instead of 8, reducing healing times and costs.

**Natural Aesthetics:** Designed to prevent bone loss and support the jawbone, providing a natural-looking smile.

**Pure Titanium Framework:** Ensures biocompatibility and corrosion resistance.

**Durability:** Advanced CAD/CAM technology and high-quality materials ensure longevity, lasting 10-20 years with proper care.

### Indications

**Acrylic Pure Titanium Implants:** Economical and adaptable, but less durable.

**Porcelain Pure Titanium Implants:** Durable and aesthetically pleasing, though expensive and hard to repair.

**Zirconia Pure Titanium Implants:** Strong and beautiful, but costly and challenging to repair.

### Considerations

**Precision:** Oral scan data or impressions before and after procedures enhance accuracy and ease adjustments.
