Basic Information

Product Specification

- Material: Ceramic
- Longevity: Long-lasting
- Biocompatibility: Yes
- Shape: Customizable
- Adhesion: Strong
- Conservation Of Tooth Structure: Minimal
- Fit: Precise
- Color: White
- Highlight: Composite ceramic inlay and onlay,
Biocompatible ceramic inlay and onlay,
Biocompatible inlay onlay restorative services

Product Description

Introduction

ADS China Dental Lab introduces the Metal Free Composite Crown Onlay Inlay, an advanced dental restoration product designed to offer natural aesthetics and robust functionality. This non-metallic option is perfect for patients who desire a metal-free, long-lasting dental solution.

Key Features

Natural-Looking Aesthetics Our composite restorations are designed to closely mimic the appearance of natural teeth, customizable to match the patient's existing teeth in color, shape, and size.

High Durability Made from top-quality composite resin, our crowns, onlays, and inlays are resistant to daily wear and tear, chipping, and cracking.

Excellent Biocompatibility Safe for patients with metal allergies, providing a non-metallic alternative that is gentle on the body.

Seamless Integration The translucency and shading of our restorations ensure they blend perfectly with natural teeth, making them nearly undetectable.

Minimal Invasive Procedure Requires minimal tooth preparation, reducing patient discomfort and making the procedure less invasive.

Benefits

Aesthetic Enhancement Achieve a natural-looking smile with custom-designed restorations.

Longevity Durable materials ensure long-lasting results, offering a cost-effective solution over time.

Versatility Ideal for various dental applications, including fillings, crowns, onlays, and inlays.

Patient Comfort Non-invasive installation process allows for immediate resumption of daily activities post-procedure.

Applications

Inlays Perfect for filling large cavities, crafted as a single piece to fit precisely in the cavity and cemented securely.

Onlays Provides more coverage than inlays, covering cusps of teeth while offering a durable restoration.

Considerations

Maintenance Proper oral hygiene and regular dental visits are crucial to maintaining the quality and longevity of the restorations.

Suitability Suitable for patients with metal sensitivities, offering a safe and biocompatible option.

Conclusion

Choose ADS China Dental Lab's Metal Free Composite Crown Onlay Inlay for a dental restoration that excels in aesthetics, durability, and patient comfort. Contact us today to learn more or to place an order.
